

Oncology

Set up to promote Supportive care products such as Durogesic for cancer pain management and Eprex for chemotherapy induced anaemia , this franchise in a short time has proved its expertise in Therapeutic Care as well with successful launch of Velcade , a novel chemotherapy agent to treat Multiple Myeloma. The Team has a winning combination of skills , trained to handle the complex narcotics logistics for Durogesic as well as actively interact with Oncologists for promoting Velcade. Operating in a highly competitive Oncology market , the team is known for its passion to excel and has time and again exhibited its never say die attitude.
